DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 44, 46. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 42. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 15-28 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Claims 15 and 25, as well as their respective dependent claims, are found to be allowable because the prior art of record neither teaches nor reasonably suggests the recitations found therein, including the combination of a reversible movement of the core with the application of an element having a defined stiff edge during reversal. This specific combination of elements allows for the braid to be reversed against a stiff edge which creates hard, stiff edge to the braid. The edge keeps the braided structure tight by not allowing the braided material to move or slip against the mandrel upon which it is braided. The closest prior art, specifically Inman et al (4519290) teaches reversible braiding, and elements inserted into the braid. The major difference between these two, however, is that the instant application allows for the element to contact the braid during reversal in an automated manner, whereas the art of Inman inserts pins into the mandrel upon which the braid is laid. The pins of Inman are not applied during reversal in an automated manner. Further, the device of Inman would not allow for the method of the instant application, and would most certainly not create the intended product of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cundiff et al (20010021427), Head et al (6679152), Uchida et al (5476027), Inman et al (4519290), and Kruesi (4494436) all teach what is well known in the art.
